### Interim Management Report of Fund Performance

For the Period Ended June 30, 2024

This Interim Management Report of Fund Performance contains financial highlights but does not contain either interim or annual financial statements of the investment fund. You may obtain a copy of the interim or annual financial statements at no cost, by calling 1-844-395-0747, by writing us at Suite 600, 517 – 10th Avenue SW, Calgary, Alberta T2R 0A8, or by visiting our website at [www.mawer.com](http://www.mawer.com) or SEDAR+ at [www.sedarplus.ca](http://www.sedarplus.ca).

Unitholders may also contact us using one of the above noted methods to request a copy of the investment fund's proxy voting policies and procedures, annual financial reports, proxy voting disclosure record, or quarterly portfolio disclosure.

This Interim Management Report of Fund Performance includes certain statements that are "forward looking information" or "forward looking statements" (collectively, "forward looking information") within the meaning of applicable securities legislation. All statements, other than statements of historical fact, included in this report that address activities, events or developments that the portfolio advisor, Mawer Investment Management Ltd., expects or anticipates will or may occur in the future, including such things as anticipated financial performance, beliefs, plans, goals, objectives, assumptions, information and statements about possible future events, conditions, results of operations, are forward looking information. The words "may", "could", "would", "should", "believe", "plan", "anticipate", "expect", "intend", "forecast", "objective", "will" and similar expressions are intended to identify forward looking information. Undue reliance should not be placed on forward looking information. Forward looking information is subject to various risks described in the Simplified Prospectus, uncertainties, and assumptions about the Fund, capital markets and economic factors, which could cause actual results to vary and in some instances to differ materially from those anticipated by the portfolio advisor and expressed in this report. Material risk factors include, but are not limited to, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, global equity and capital markets, business competition, technological change, changes in government regulations, unexpected judicial or regulatory proceedings, and catastrophic events. The foregoing list of risk factors is not exhaustive.

All opinions contained in forward looking information are subject to change without notice and are provided in good faith and are based on the estimates and opinions of the portfolio advisor at the time the information is presented. The portfolio advisor has no specific intention of updating any forward looking information whether as a result of new information, future events or otherwise, except as required by securities legislation. Certain information about specific holdings in the Fund, including any opinion, is based upon various sources believed to be reliable, but cannot be guaranteed to be current, accurate or complete and is subject to change without notice.

### Management Discussion of Fund Performance

#### Investment Objectives and Strategies

The Mawer Balanced Fund (the "Fund") aims to protect and grow investors' capital through capital appreciation and the receipt of dividend and interest income. The Fund invests in other Mawer Funds, which invest in equity and equity-related securities, and in fixed-income securities such as treasury bills, short-term notes, debentures, and bonds.

The Manager examines current market statistics and makes an assessment of future outcomes based upon a probability-based scenario analysis. Using these techniques the Manager constructs the asset mix. Investment in underlying Mawer Canadian Bond Fund is used primarily to control risk and the Manager focuses on security, sector, credit and curve analysis in making investment decisions. Investment considerations may include interest rates, yield spreads, exchange rates, structures, credit spread and fundamental analysis of sovereign, government, corporate and structured finance issuers. In equities we search for wealth-creating companies whose equities can be purchased at a discount to their intrinsic value.

#### Risk

This Fund is suitable for investors seeking long-term growth and who have a low-to-medium tolerance for risk. General risks of investing in this Fund are outlined in the Prospectus and include the possibility of reduction in value of any given investment, liquidity risk, interest rate risk, and currency risk amongst others. Since this Fund invests primarily in Series O units of other Mawer Mutual Funds there are two additional risks: multi-class risk and fund on fund risk.

The Manager limits the risk of investing in a single asset class by limiting the amount invested in equities in any one industry, and by limiting the percentage of the Fund that can be shifted in a single move from one asset class to another.

Given the difficulty in predicting interest rate moves, the Manager also limits exposure to this risk factor. In setting policy, the underlying Mawer Canadian Bond Fund's duration is set within 1 year on either side of the index.

#### Results of Operations

The Fund's net assets decreased 6.4% to \$4,410.3 million from \$4,709.5 million at June 30, 2024. Of this change, \$201.7 million is attributable to positive investment performance and -\$500.9 million was due to net redemptions to the Fund.

The Manager assesses the Fund's underlying securities for liquidity on a quarterly basis. During the period the Fund has remained in compliance with National Instrument 81-102 and has maintained an illiquid concentration of less than 10% of the Fund's Net Asset Value. During the period there were no notable redemptions to the Fund that affected its liquidity.

## Mawer Balanced Fund

---

The Fund's Series A Units returned 4.4% after management fees in the first half of 2024 versus a 6.3% return for the blended benchmark that consists of: 5% FTSE 91-day Treasury Bill Index; 35% FTSE Canada Universe Bond Index, 15% S&P/TSX Composite Index, 7.5% S&P/TSX SmallCap Index, 15% S&P 500 Index, 15% MSCI ACWI (ex. U.S., Net) and 7.5% MSCI ACWI Small Cap Index (Net). All performance values are in Canadian dollar terms.

Artificial intelligence was a central theme over the first half of 2024, significantly impacting the information technology sector and driving anticipated increases in electrical demand for data centers. Zooming out, the longer-term trend of moderating inflation remains intact, although the central bank's job is not done yet. Market expectations for future interest rate cuts were reduced as the U.S. Federal Reserve grappled with stubborn inflation. Meanwhile, central bankers in Canada and Europe have begun reducing policy rates, but their messaging to market participants has stressed that policy action will be measured and data dependent.

Regarding asset mix, the Fund trimmed its U.S. equity weight and added to Canadian bonds, though it remains underweight in bonds. Additionally, a portion of the U.S. equity allocation was shifted to the U.S. Mid Cap equity strategy to enhance overall portfolio diversification.

From a relative perspective, the Fund underperformed the blended benchmark due to security selection. Negative security selection over the period is attributable to the underperformance of the Fund's U.S. equity and global small cap holdings relative to the S&P 500 and ACWI Small Cap indices, respectively. The contribution from asset mix allocation was positive over the period, driven by the inclusion of emerging market equities and overweight to U.S. equities.

The top three individual contributors for the period included TSMC, Amphenol, and Rheinmetall. Holdings in TSMC benefitted from the explosive growth in demand expectations for the semiconductor industry. The company possesses robust competitive advantages largely tied to technological know-how, reputation, high barriers to entry-both financially and with respect to learning curves-and significant market shares. Amphenol benefitted from increased demand for its electronic components, with 5% of sales directly used in AI datacenters. Defense manufacturer Rheinmetall moved higher on continued geopolitical concerns and higher defense spending.

The bottom three detractors consisted of Tsuruha Holdings, Nike, and Edenred. Drug store operator Tsuruha continues to suffer from a pandemic hangover, with demand for COVID-19 related products declining. Shares had risen last year on the hopes that Tsuruha would be acquired given the involvement of an activist investor but have subsequently fallen as this hasn't materialized.

For global leader of athletic footwear Nike, consumer demand appears to be dragging and its growth in China has been slower-than-expected. Management remains focused on improving margins and profitability with cost cutting and product innovation amongst its key strategic projects. French meal, food, and fuel voucher company Edenred suffered from political and regulatory uncertainty in its domestic market due to the surprise French legislative election. Additionally, the company's Brazilian business has been exposed to a weakening Brazilian real.

Thinking longer-term, there exists a concern about the trend toward more protectionist policies, less globalization, more conflict, and a multi-polar world. Current trends, along with a higher cost of capital, may imply lower real returns from equities moving forward. Because of this, valuation remains a crucial factor of the investment strategy. Companies with competitively advantaged revenue streams are expected to benefit from sustained economic growth and provide defensiveness in a deteriorating macroeconomic environment. Acquiring these securities at a discount to their intrinsic values theoretically offers greater upside in bullish scenarios and better downside protection if markets correct. The objective is to strike a balance, aiming to minimize the probability of permanent impairment of capital while leading to long-term compounding of wealth.

### Recent Developments

There are no recent developments to report related to the strategic positioning of the Fund, the Manager, or the policies of the Independent Review Committee.

### Related Party Transactions – Management Fees

The Portfolio Advisor receives management fees, which are calculated for Series A Units as 0.78% per annum of the net asset value of the Fund calculated on a daily basis. Management fees for Series O Units are payable directly to the Manager by Series O investors and not by the Fund.

The Manager of the Fund has the ability, at their discretion, to reduce the management fees for large investors. This reduction is effected by means of a management fee distribution and will be automatically reinvested in additional units of the Fund at the net asset value of the Fund on the date of distribution. Mawer also receives fees for performing administrative services. As at June 30, 2024 the Fund owes Mawer \$0 related to these administrative services.

### Financial Highlights

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the six-month period ended June 30, and for each of the past five years ended December 31 as applicable. This information is derived from the Fund's unaudited interim financial statements and audited annual financial statements which are prepared in accordance with IFRS.

<sup>(1)</sup> This information is for the period ended June 30, 2024 and December 31 of any other period(s) shown.

<sup>(2)</sup> Management expense ratio is based on total expenses for the stated period and is expressed as an annualized percentage of daily average net assets during the period.

<sup>(3)</sup> The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period.

<sup>(4)</sup> The Fund's portfolio turnover rate indicates how actively the Fund's Portfolio Advisors manage its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a fund's portfolio turnover rate in a period, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

### Past Performance

Sales commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the Prospectus before investing. The indicated rates of return are the historical annual compounded total returns including changes in unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any investor that would have reduced returns. Mutual funds are not guaranteed. Their value changes frequently and past performance may not be repeated.

## Mawer Balanced Fund

The Fund's performance numbers assume that all distributions are reinvested in additional units of the Fund. If you hold this Fund outside of a registered plan, income and capital gains distributions that are paid to you increase your income for tax purposes whether paid to you in cash or reinvested in additional units. The amount of the reinvested taxable distributions is added to the adjusted cost base of the units that you own. This would decrease your capital gains or increase your capital loss when you later redeem from the Fund, thereby ensuring that you are not taxed on this amount again. Please consult your tax advisor regarding your personal tax situation.

The past performance of the Fund is set out in the following charts.

### Year-by-Year Returns

The bar charts below show the Fund's annual performance in each of the past 10 years, if applicable, to December 31. The charts show in percentage terms how an investment made on January 1 would have increased or decreased by December 31 of the fiscal year.

#### Series A

#### Series O

<sup>(1)</sup> This information is for the period ended June 30, 2024 and December 31 of any other period(s) shown.

<sup>(\*)</sup> Series A start date was March 31, 1988; Series O start date was July 4, 2006.

### Annual Compound Returns

The following table shows the historical annual compound total return of the Fund for the periods shown ending on June 30, 2024. The annual compound total return is also compared to the Internal Balanced Benchmark ("IB Benchmark") calculated on the same compound basis. All index returns are calculated in Canadian dollars on a total return basis, meaning that all distributions are reinvested.

	1 Year	3 Year	5 Year	10 Year	Since Inception <sup>(*)</sup>
Mawer Balanced Fund – Series A	9.8%	2.0%	4.9%	6.3%	7.9%
Internal Balanced Benchmark	12.1%	3.5%	6.3%	6.2%	7.7%
Mawer Balanced Fund – Series O	10.8%	2.9%	5.8%	7.2%	7.9%
Internal Balanced Benchmark	12.1%	3.5%	6.3%	6.2%	6.2%

<sup>(\*)</sup> Series A start date was March 31, 1988; Series O start date was July 4, 2006.

The IB Benchmark is a benchmark prepared by the Manager and is designed to reflect the average asset mix of a universe of balanced fund managers which consists of the FTSE Canada 91 day T-Bill Index (5%); FTSE Canada Universe Bond Index (35%), designed to reflect the Canadian bond market; S&P/TSX Composite Index (15%), designed to represent the Canadian mid-large cap equity market; S&P/TSX Small Cap Index (7.5%), designed to represent the Canadian small cap equity market; S&P 500 Index (15%), designed to represent the US equity market; MSCI ACWI ex-USA Index (net) (15%), designed to reflect international stock markets; and MSCI ACWI Small Cap Index (net) (7.5%), designed to represent the global small cap equity market. Prior to May 31, 2021 the IB Benchmark consisted of FTSE Canada 91 day T-Bill Index (5%); FTSE Canada Universe Bond Index (30%); FTSE World Government Bond Index (5%); S&P/TSX Composite Index (15%); S&P/TSX Small Cap Index (7.5%); S&P 500 Index (15%); MSCI ACWI ex-USA Index (net) (15%); and MSCI ACWI Small Cap Index (net) (7.5%).

### Summary of Investment Portfolio

A summary of the Fund as at June 30, 2024 is as follows:

Portfolio Allocation	% of Net Asset Value
Mutual Funds	97.83%
Cash and Cash Equivalents	0.06%
Fixed Income	34.68%
Equities	63.09%
Cash and Cash Equivalents	2.32%
Other Net Assets (Liabilities)	(0.15)%
<b>Total</b>	<b>100.00%</b>

## Mawer Balanced Fund
