
Mawer Balanced Fund

Interim Management Report of Fund Performance

For the Period Ended June 30, 2025

This Interim Management Report of Fund Performance contains financial highlights but does not contain either interim or annual financial statements of the investment fund. You may obtain a copy of the interim or annual financial statements at no cost, by calling 1-844-395-0747, by writing us at Suite 600, 517 – 10th Avenue SW, Calgary, Alberta T2R 0A8, or by visiting our website at www.mawer.com or SEDAR+ at www.sedarplus.com.

Unitholders may also contact us using one of the above noted methods to request a copy of the investment fund's proxy voting policies and procedures, annual financial reports, proxy voting disclosure record, or quarterly portfolio disclosure.

This Interim Management Report of Fund Performance includes certain statements that are "forward looking information" or "forward looking statements" (collectively, "forward looking information") within the meaning of applicable securities legislation. All statements, other than statements of historical fact, included in this report that address activities, events or developments that the portfolio advisor, Mawer Investment Management Ltd., expects or anticipates will or may occur in the future, including such things as anticipated financial performance, beliefs, plans, goals, objectives, assumptions, information and statements about possible future events, conditions, results of operations, are forward looking information. The words "may", "could", "would", "should", "believe", "plan", "anticipate", "expect", "intend", "forecast", "objective", "will" and similar expressions are intended to identify forward looking information. Undue reliance should not be placed on forward looking information. Forward looking information is subject to various risks described in the Simplified Prospectus, uncertainties, and assumptions about the Fund, capital markets and economic factors, which could cause actual results to vary and in some instances to differ materially from those anticipated by the portfolio advisor and expressed in this report. Material risk factors include, but are not limited to, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, global equity and capital markets, business competition, technological change, changes in government regulations, unexpected judicial or regulatory proceedings, and catastrophic events. The foregoing list of risk factors is not exhaustive.

All opinions contained in forward looking information are subject to change without notice and are provided in good faith and are based on the estimates and opinions of the portfolio advisor at the time the information is presented. The portfolio advisor has no specific intention of updating any forward looking information whether as a result of new information, future events or otherwise, except as required by securities legislation. Certain information about specific holdings in the Fund, including any opinion, is based upon various sources believed to be reliable, but cannot be guaranteed to be current, accurate or complete and is subject to change without notice.

Management Discussion of Fund Performance

Investment Objectives and Strategies

The Mawer Balanced Fund (the "Fund") aims to protect and grow investors' capital through capital appreciation and the receipt of dividend and interest income. The Fund invests in other Mawer Funds, which invest in equity and equity-related securities, and in fixed-income securities such as treasury bills, short-term notes, debentures, and bonds.

For asset mix, the Manager analyzes which combination of asset classes is most likely to offer the most attractive risk/return characteristics within a medium to long-term time frame, and carries out asset mix changes gradually to reduce risk.

Risk

The risk level of the Fund did not change during the year. This Fund is suitable for investors seeking long-term growth and who have a low-to-medium tolerance for risk. General risks of investing in this Fund are outlined in the Prospectus and include the possibility of reduction in value of any given investment, liquidity risk, interest rate risk, and currency risk amongst others. Since this Fund invests primarily in Series O Units of other Mawer Mutual Funds there are two additional risks: multi-class risk and fund on fund risk.

Results of Operations

The Fund's net assets decreased 2.3% to \$4,187.8 million from \$4,288.0 million at June 30, 2025. Of this change, \$244.0 million is attributable to positive investment performance and -\$344.2 million was due to net redemptions from the Fund.

The Manager assesses the Fund's underlying securities for liquidity on a quarterly basis. During the period the Fund has remained in compliance with National Instrument 81-102 and has maintained an illiquid concentration of less than 10% of the Fund's Net Asset Value. During the period there were no notable redemptions to the Fund that affected its liquidity.

Performance Overview

Over the six-month period, the Fund's Series A Units returned 5.9% (after fees and expenses), compared to the blended benchmark's 5.4%. The benchmark is comprised of 5% FTSE 91-day Treasury Bill Index, 35% FTSE Canada Universe Bond Index, 15% S&P/TSX Composite Index, 7.5% S&P/TSX SmallCap Index, 15% S&P 500 Index, 15% MSCI ACWI (ex U.S., Net), and 7.5% MSCI ACWI Small Cap Index (Net). All performance values provided are in Canadian dollar terms.

The Fund's absolute performance was driven by positive contributions from nearly all equity classes, especially international and Canadian large cap equities. Relative outperformance was primarily due to strong security selection within international and global small cap equities, compared to the MSCI ACWI ex U.S. and MSCI ACWI Small Cap indices. Asset mix allocation detracted modestly from results, mainly due to an underweight in Canadian small cap equities.

Mawer Balanced Fund

Key Contributors and Detractors

Defense-related holdings were significant contributors: Germany's Rheinmetall, France's Thales, the UK's BAE, and the recently added Leonardo all delivered strong returns, supported by rising European defense spending and a rapidly evolving geopolitical landscape. These companies benefit from established customer bases, the critical nature of their products, and decades of industry consolidation and underinvestment. Amphenol also continued its strong performance, driven by steady demand for electronic components.

On the other hand, UnitedHealth faced multiple challenges, including lower Medicare Advantage reimbursements, higher claims costs, a criminal investigation, CEO transition, and the withdrawal of 2025 guidance. The company is prioritizing customer retention and may adjust pricing in the future to restore profitability.

TFI International's U.S. segment experienced a slowdown in volumes, with tariff uncertainty also weighing on the stock. The sub-advisor remains confident in management's ability to address underperformance in the U.S. less-than-truckload segment. Bunzl, a recurring consumables distributor, declined sharply following a profit warning related to increased competition and internal execution issues. However, management is taking decisive action, and the CEO's recent personal investment in shares is viewed as a positive signal.

Market Outlook

Despite equity markets reaching or approaching all-time highs, the global environment remains highly uncertain, with escalating trade tensions, persistent inflationary pressures, and complex geopolitical risks. Secular trends such as de-globalization, protectionism, and increased government intervention continue to shape the investment landscape.

In this environment, we remain focused on investing in high-quality companies led by strong management teams—businesses we believe are well-positioned to navigate uncertainty, protect capital in downturns, and capitalize on emerging opportunities. Maintaining a diversified portfolio and prudent risk management remains central to our approach as we adapt to evolving market dynamics.

Recent Developments

Effective December 31, 2024, Mr. Robert Kennedy retired from the Independent Review Committee (the "IRC"). Mr. Jerry Patava replaced Mr. Robert Kennedy on January 1, 2025.

Related Party Transactions – Management Fees

The Portfolio Advisor receives management fees of 0.78% per annum for Series A Units of the Fund. The management fee is calculated daily at the rate of 1/365 (or 1/366 in a leap year) as the percentage of aggregate net asset value of the Series A Units of the Fund as of the last Valuation Date. The fee accrues daily and is paid monthly in arrears. Management fees for Series O Units are payable directly to the Manager by Series O investors and not by the Fund.

The Manager of the Fund has the ability, at their discretion, to reduce the management fees for large investors. This reduction is effected by means of a management fee distribution and will be automatically reinvested in additional units of the Fund at the net asset value of the Fund on the date of distribution. Mawer also receives fees for performing administrative services. As at June 30, 2025 the Fund owes Mawer \$0 related to these administrative services.

Financial Highlights

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the six-month period ended June 30, and for each of the past five years ended December 31 as applicable. This information is derived from the Fund's unaudited interim financial statements and audited annual financial statements which are prepared in accordance with IFRS.

The Fund's Net Asset Value (NAV) per Unit¹

SERIES A	2025	2024	2023	2022	2021	2020

Net asset value per unit¹	37.56	35.55	32.78	30.77	36.57	33.74

- ⁽¹⁾ This information is for the period ended June 30, 2025 and December 31 of any other period(s) shown.
- ⁽²⁾ Management expense ratio is based on total expenses for the stated period and is expressed as an annualized percentage of daily average net assets during the period.
- ⁽³⁾ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period.
- ⁽⁴⁾ The Fund's portfolio turnover rate indicates how actively the Fund's Portfolio Advisors manage its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a fund's portfolio turnover rate in a period, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

Past Performance

Sales commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the Prospectus before investing. The indicated rates of return are the historical annual compounded total returns including changes in unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any investor that would have reduced returns. Mutual funds are not guaranteed. Their value changes frequently and past performance may not be repeated.

The Fund's performance numbers assume that all distributions are reinvested in additional units of the Fund. If you hold this Fund outside of a registered plan, income and capital gains distributions that are paid to you increase your income for tax purposes whether paid to you in cash or reinvested in additional units. The amount of the reinvested taxable distributions is added to the adjusted cost base of the units that you own. This would decrease your capital gains or increase your capital loss when you later redeem from the Fund, thereby ensuring that you are not taxed on this amount again. Please consult your tax advisor regarding your personal tax situation.

The past performance of the Fund is set out in the following charts.

Mawer Balanced Fund

Year-by-Year Returns

The bar charts below show the Fund's annual performance in each of the past 10 years, if applicable, to December 31. The charts show in percentage terms how an investment made on January 1 would have increased or decreased by December 31 of the fiscal year.

Series A^{(1)(*)}

Series O^{(1)(*)}

⁽¹⁾ This information is for the period ended June 30, 2025 and December 31 of any other period(s) shown.

^(*) Series A start date was March 31, 1988; Series O start date was July 4, 2006.

Annual Compound Returns

The following table shows the historical annual compound total return of the Fund for the periods shown ending on June 30, 2025. The annual compound total return is also compared to the Internal Balanced Benchmark ("IB Benchmark") calculated on the same compound basis.

	1 Year	3 Year	5 Year	10 Year	Since Inception
Mawer Balanced Fund – Series A	12.5%	10.7%	6.2%	6.4%	8.1%
Internal Balanced Benchmark	14.2%	12.2%	8.3%	6.8%	7.8%
Mawer Balanced Fund – Series O	13.6%	11.7%	7.1%	7.3%	8.2%
Internal Balanced Benchmark	14.2%	12.2%	8.3%	6.8%	6.6%

^(*) Series A start date was March 31, 1988; Series O start date was July 4, 2006.

The IB Benchmark is a benchmark prepared by the Manager and is designed to reflect the average asset mix of a universe of balanced fund managers which consists of the FTSE Canada 91 day T-Bill Index (5%); FTSE Canada Universe Bond Index (35%), designed to reflect the Canadian bond market; S&P/TSX Composite Index (15%), designed to represent the Canadian mid-large cap equity market; S&P/TSX Small Cap Index (7.5%), designed to represent the Canadian small cap equity market; S&P 500 Index (15%), designed to represent the US equity market; MSCI ACWI ex-USA Index (net) (15%), designed to reflect international stock markets; and MSCI ACWI Small Cap Index (net) (7.5%), designed to represent the global small cap equity market from May 31, 2021 onwards. Please refer to www.mawer.com for benchmark history. All index returns are calculated in Canadian dollars on a total return basis, meaning that all distributions are reinvested.
