
Mawer EAFE Large Cap Fund

Annual Management Report of Fund Performance

For the Year Ended December 31, 2024

This Annual Management Report of Fund Performance contains financial highlights but does not contain the complete annual financial statements of the investment fund. You may obtain a copy of the annual financial statements at no cost by calling 1-844-395-0747, by writing us at Suite 600, 517 – 10th Avenue SW, Calgary, Alberta T2R 0A8, or by visiting our website at www.mawer.com or SEDAR+ at www.sedarplus.com.

Unitholders may also contact us using one of the above noted methods to request a copy of the investment fund's proxy voting policies and procedures, interim financial reports, proxy voting disclosure record, or quarterly portfolio disclosure.

This Annual Management Report of Fund Performance includes certain statements that are "forward looking information" or "forward looking statements" (collectively, "forward looking information") within the meaning of applicable securities legislation. All statements, other than statements of historical fact, included in this report that address activities, events or developments that the portfolio advisor, Mawer Investment Management Ltd., expects or anticipates will or may occur in the future, including such things as anticipated financial performance, beliefs, plans, goals, objectives, assumptions, information and statements about possible future events, conditions, results of operations, are forward looking information. The words "may", "could", "would", "should", "believe", "plan", "anticipate", "expect", "intend", "forecast", "objective", "will" and similar expressions are intended to identify forward looking information. Undue reliance should not be placed on forward looking information. Forward looking information is subject to various risks described in the Simplified Prospectus, uncertainties, and assumptions about the Fund, capital markets and economic factors, which could cause actual results to vary and in some instances to differ materially from those anticipated by the portfolio advisor and expressed in this report. Material risk factors include, but are not limited to, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, global equity and capital markets, business competition, technological change, changes in government regulations, unexpected judicial or regulatory proceedings, and catastrophic events. The foregoing list of risk factors is not exhaustive.

All opinions contained in forward looking information are subject to change without notice and are provided in good faith and are based on the estimates and opinions of the portfolio advisor at the time the information is presented. The portfolio advisor has no specific intention of updating any forward looking information whether as a result of new information, future events or otherwise, except as required by securities legislation. Certain information about specific holdings in the Fund, including any opinion, is based upon various sources believed to be reliable, but cannot be guaranteed to be current, accurate or complete and is subject to change without notice.

Management Discussion of Fund Performance

Investment Objectives and Strategies

The objective of the Mawer EAFE Large Cap Fund (the "Fund") is to achieve above-average long-term risk-adjusted returns and to create a diversified portfolio of equity and equity related securities of larger companies located in developed countries outside of Canada and the United States, primarily in Europe, Australasia and the Far East (EAFE). This is done by choosing companies that we believe will be wealth-creating in the long term and are trading at a discount to their intrinsic value. We prefer companies with enduring competitive advantages that will allow them to earn a return greater than their cost of capital over the long term. The Fund has a long-term buy and hold strategy and seeks to keep turnover low.

Risk

The risk level of the Fund did not change during the year. This Fund is suitable for investors seeking long-term growth and who have a medium risk tolerance. General risks of investing in this Fund are outlined in the Prospectus and include the possibility of reduction in value of any given investment, liquidity risk, interest rate risk and currency risk amongst others.

The Manager attempts to reduce the exposure to these risks by not concentrating more than 20% of the net assets of the Fund in a particular Industry as defined by the Global Industry Classification Standards (GICS). The Manager provides diversification of risk by investing primarily in equity and equity related securities of larger companies located in developed countries outside of Canada and the United States, primarily in Europe, Australasia and the Far East (EAFE).

Results of Operations

The Fund's net assets increased 25.5% to \$102.4 million from \$81.6 million at December 31, 2024. Of this change, \$7.4 million is attributable to positive investment performance and \$13.4 million was due to net contributions to the Fund.

The Manager assesses the Fund's underlying securities for liquidity on a quarterly basis. During the period the Fund has remained in compliance with National Instrument 81-102.

The Fund's A-series units returned 7.8% after management fees over 2024, in comparison to the MSCI EAFE Index (Net) return of 13.2% over the same period. All performance values provided are in Canadian dollar terms.

Overall, monetary easing and positive sentiment around the potentially transformational impact of artificial intelligence led to strength in the equity markets. In terms of relative performance, security selection was negative, particularly in Industrials. Sector allocation was positive over the period.

Mawer EAFE Large Cap Fund

Freight forwarder Kuehne + Nagel, whose revenues are tied to global trade, and chemicals distributor Brenntag declined over the period. Both companies experienced weaker volumes than anticipated given ongoing de-stocking efforts globally. On a positive note, reference information provider Wolters Kluwer and financial services group DBS Group gained on positive fundamentals. The position in semiconductor equipment company DISCO Corporation benefitted from the explosive growth in demand expectations for the industry.

The most notable addition was French communications agency Publicis which specializes in creative content/brand management, media buying, and marketing related technology and data consulting. The business benefits from a scale advantage in media buying, customer stickiness due to familiarity, reputation, and integration into customer IT and marketing departments, and relatively stable and recurring revenue. Another notable initiation was in DNB Bank, Norway's leading retail and corporate bank. In contrast to continental European banks, DNB operates in a relatively stable and oligopolistic market, has a conservative track record of lending, and provides valuation and diversification benefits to the portfolio. Norway's relatively strong economy and well-financed government add a measure of protection to the cyclical risks inherent in the banking business model. Meanwhile, the notable exits included Eurofins Scientific and Shimano, in favour of better opportunities elsewhere. Admittedly, there are important transitions occurring in the world today. Election results in 2024 can be broadly summarized as a resounding rejection of status quo incumbents and a swing to the right. A shift toward the G-Zero model coined by Ian Bremmer—a multipolar world devoid of global leadership—appears to have accelerated, with mercantilist trade policies and conflict on the rise. There is also the promise of artificial intelligence, and bond investors appear increasingly wary of stretched government coffers.

Recent Developments

Effective December 31, 2024, Mr. Robert Kennedy retired from the Independent Review Committee (the "IRC"). Mr. Jerry Patava replaced Mr. Robert Kennedy on January 1, 2025.

Related Party Transactions – Management Fees

The Portfolio Advisor receives management fees of 1.10% per annum for series A units of the Fund. The management fee is calculated daily at the rate of 1/365 (or 1/366 in a leap year) as the percentage of aggregate net asset value of the Series A Units of the Fund as of the last Valuation Date. The fee accrues daily and is paid monthly in arrears. Management fees for Series O Units are payable directly to the Manager by Series O investors and not by the Fund.

The Manager of the Fund has the ability, at their discretion, to reduce the management fees for large investors. This reduction is effected by means of a management fee distribution and will be automatically reinvested in additional units of the Fund at the net asset value of the Fund on the date of distribution. Mawer also receives fees for performing administrative services. As at December 31, 2024 the Fund owes Mawer \$0 related to these administrative services.

Financial Highlights

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance since inception. This information is derived from the Fund's audited financial statements which are prepared in accordance with IFRS.

The Fund's Net Asset Value (NAV) per Unit¹

SERIES A	2024	2023	2022	2021	2020

Net asset value per unit ⁴	13.72	12.78	10.95	13.23	11.51

⁽¹⁾ This information is provided as at December 31 of the year shown, as applicable.

⁽²⁾ Management expense ratio is based on total expenses for the stated year and is expressed as an annualized percentage of daily average net assets during the year. The Manager, at its discretion, absorbed certain expenses otherwise payable by each Series. The Manager may change the amount absorbed or discontinue absorbing these expenses at any time without notice.

⁽³⁾ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the year.

⁽⁴⁾ The Fund's portfolio turnover rate indicates how actively the Fund's Portfolio Advisors manage its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

Past Performance

Sales commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the Prospectus before investing. The indicated rates of return are the historical annual compounded total returns including changes in unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any investor that would have reduced returns. Mutual funds are not guaranteed. Their value changes frequently and past performance may not be repeated.

The Fund's performance numbers assume that all distributions are reinvested in additional units of the Fund. If you hold this Fund outside of a registered plan, income and capital gains distributions that are paid to you increase your income for tax purposes whether paid to you in cash or reinvested in additional units. The amount of the reinvested taxable distributions is added to the adjusted cost base of the units that you own. This would decrease your capital gains or increase your capital loss when you later redeem from the Fund, thereby ensuring that you are not taxed on this amount again. Please consult your tax advisor regarding your personal tax situation.

The past performance of the Fund is set out in the following charts.

Year-by-Year Returns

The bar charts below show the Fund's annual performance in each of the past 10 years, if applicable, to December 31. The charts show in percentage terms how an investment made on January 1 would have increased or decreased by December 31 of the fiscal year.

Series A^(*)

Series O^(*)

^(*) Series A start date was May 29, 2020; Series O start date was May 29, 2020.

Annual Compound Returns

The following table shows the historical annual compound total return of the Fund for the periods shown ending on December 31, 2024. The annual compound total return is benchmarked to the MSCI EAFE Index (net) and calculated on the same compound basis.

	1 Year	3 Year	Since Inception
Mawer EAFE Large Cap Fund – Series A	7.8%	1.6%	7.3%
MSCI EAFE Index Net	13.2%	6.1%	9.7%
Mawer EAFE Large Cap Fund – Series O	9.2%	2.9%	8.7%
MSCI EAFE Index Net	13.2%	6.1%	9.7%

^(*) Series A start date was May 29, 2020; Series O start date was May 29, 2020.

The MSCI EAFE Index (net) captures large and mid cap representation across 21 Developed Markets around the world, excluding the US and Canada. All index returns are calculated in Canadian dollars on a total return basis, meaning that all distributions are reinvested.
